DOCTORS, DENTISTS AND MIDWIFES

Depending on our needs, experienced doctors, specialists, dentists and midwives are welcome in Haydom. It would be great if you can use your knowledge in a challenging country as Tanzania and in a remote hospital that still meets high standards taking into account the sub-Saharan setting. Because of the challenges related to the different culture together with the costly process of getting a medical license from The Medical Council of Tanganyika we strongly recommend experts to offer their services for a longer period. See our document VISA about the requirements to get your working permit and doctors license.

How to apply?

Send an e-mail with your motivation letter, preferred period of stay and CV and your specialization with the ward you want to work to expats@haydom.co.tz

What happens if I apply?

You will receive an answer from the expats coordinator to approve or reject your application. This is mainly depending on the specialization (if we are in need of that) and the period you can come (the longer the better).

What should I arrange after approval?

Collect the documents as mentioned on the VISA document.

More information about your preparations and what to take, you can find in the document Preparations for your visit.
