

**Haydom
Lutheran
Hospital**

ELCT Mbulu Diocese

NURSING STUDENTS

As Haydom Lutheran Hospital also has a Nursing School, called the Institute of Health Sciences, we are used to have nursing students around. But, we have only limited places for nursing students so we limit the nursing students to those who are in one of the schools we have an agreement with.

Coordinator of the nursing students from abroad is:

Malvin Torsvik
Associate Prof./Faculty International Coordinator Faculty of Health Science
Nord Trøndelag University College
N-7600 Levanger
NORWAY
Phone office +47 74022938/ Mobile +47 95993304 E-
mail: malvin.torsvik@hint.no

All nursing students are under the responsibility of Institute of Health Sciences, and not directly under the hospital. As Institute of Health Sciences is a separate unit from the Hospital, the application process is a bit different. Please contact the contact person in your college, our coordinator in Norway or send us an email expats@haydom.co.tz

By 2021 HLH cooperates with the following nursing schools:

Betanien Deaconess University College
Bergen Diakonhjemmet University College
Oslo Haralds plass Deaconess University College
Bergen University
Nord-Trøndelag University College
Stavanger University College

If you are from another College please write to expats@haydom.co.tz.

As a nursing student you are the responsibility of Institute of Health Sciences, and have to follow their rules and guidelines. You will get more information about this sent to you when you have applied.

Please note that we take third year students only. The Institute of Health Sciences can have up to 12 students at the same time. The months January – March and

September – December are reserved for the students of the above mentioned Norwegian colleges.

Accommodation for nurses students is in the School of Nursing. Also the meals are provided there. The fee for accommodation, including meals, is US\$200 per week.

Application:

We recommend that you apply well in advance – the longer in advance, the more likely it is that we can offer you a place, or an alternative date. The application always goes through the coordinator at your college.

Documents required:

Student visitors to Haydom who are not Tanzanian Nationals will need a Business Visa in order to be able to work at Haydom. See the page Visa for information about price and the process. The required documents for your stay are the same as mentioned for Medical Students. If you want to stay more than 3 months you need a Class C working permit that should be arranged prior to your visit.

Practical points:

- You should bring your own work clothes with you (e.g. white coat, scrubs or whatever you normally wear)
- You will usually have accommodation in the nursing school within the hospital compound. You may have to share accommodation with another student.
- It is up to you to step forward and join in clinical and social activities. Students find this a positive way of getting involved.
- For more information about your preparations, travel, stay and other practical issues look at the general pages for visitors on this website. A lot of questions are answered here. If you have further questions feel free to contact the student coordinator at [haydomnursing\(@\)haydom.co.tz](mailto:haydomnursing(@)haydom.co.tz)
